

Unlocking the potential of health data

Ciox Health’s leading clinical data technology empowers greater health by unlocking the potential of data in medical records.

#LAWENFORCEMENT #DIGITAL TRANSFORMATION

From paper to intelligence

In an industry where paper records still survive as a cultural barrier, one of CIOX’s main apps (IntakeApp) was dealing with problems such us:

- Product growth delays
- Operators efficiency affected
- Outdated management and processing of patient medical records.

Toward the future of health

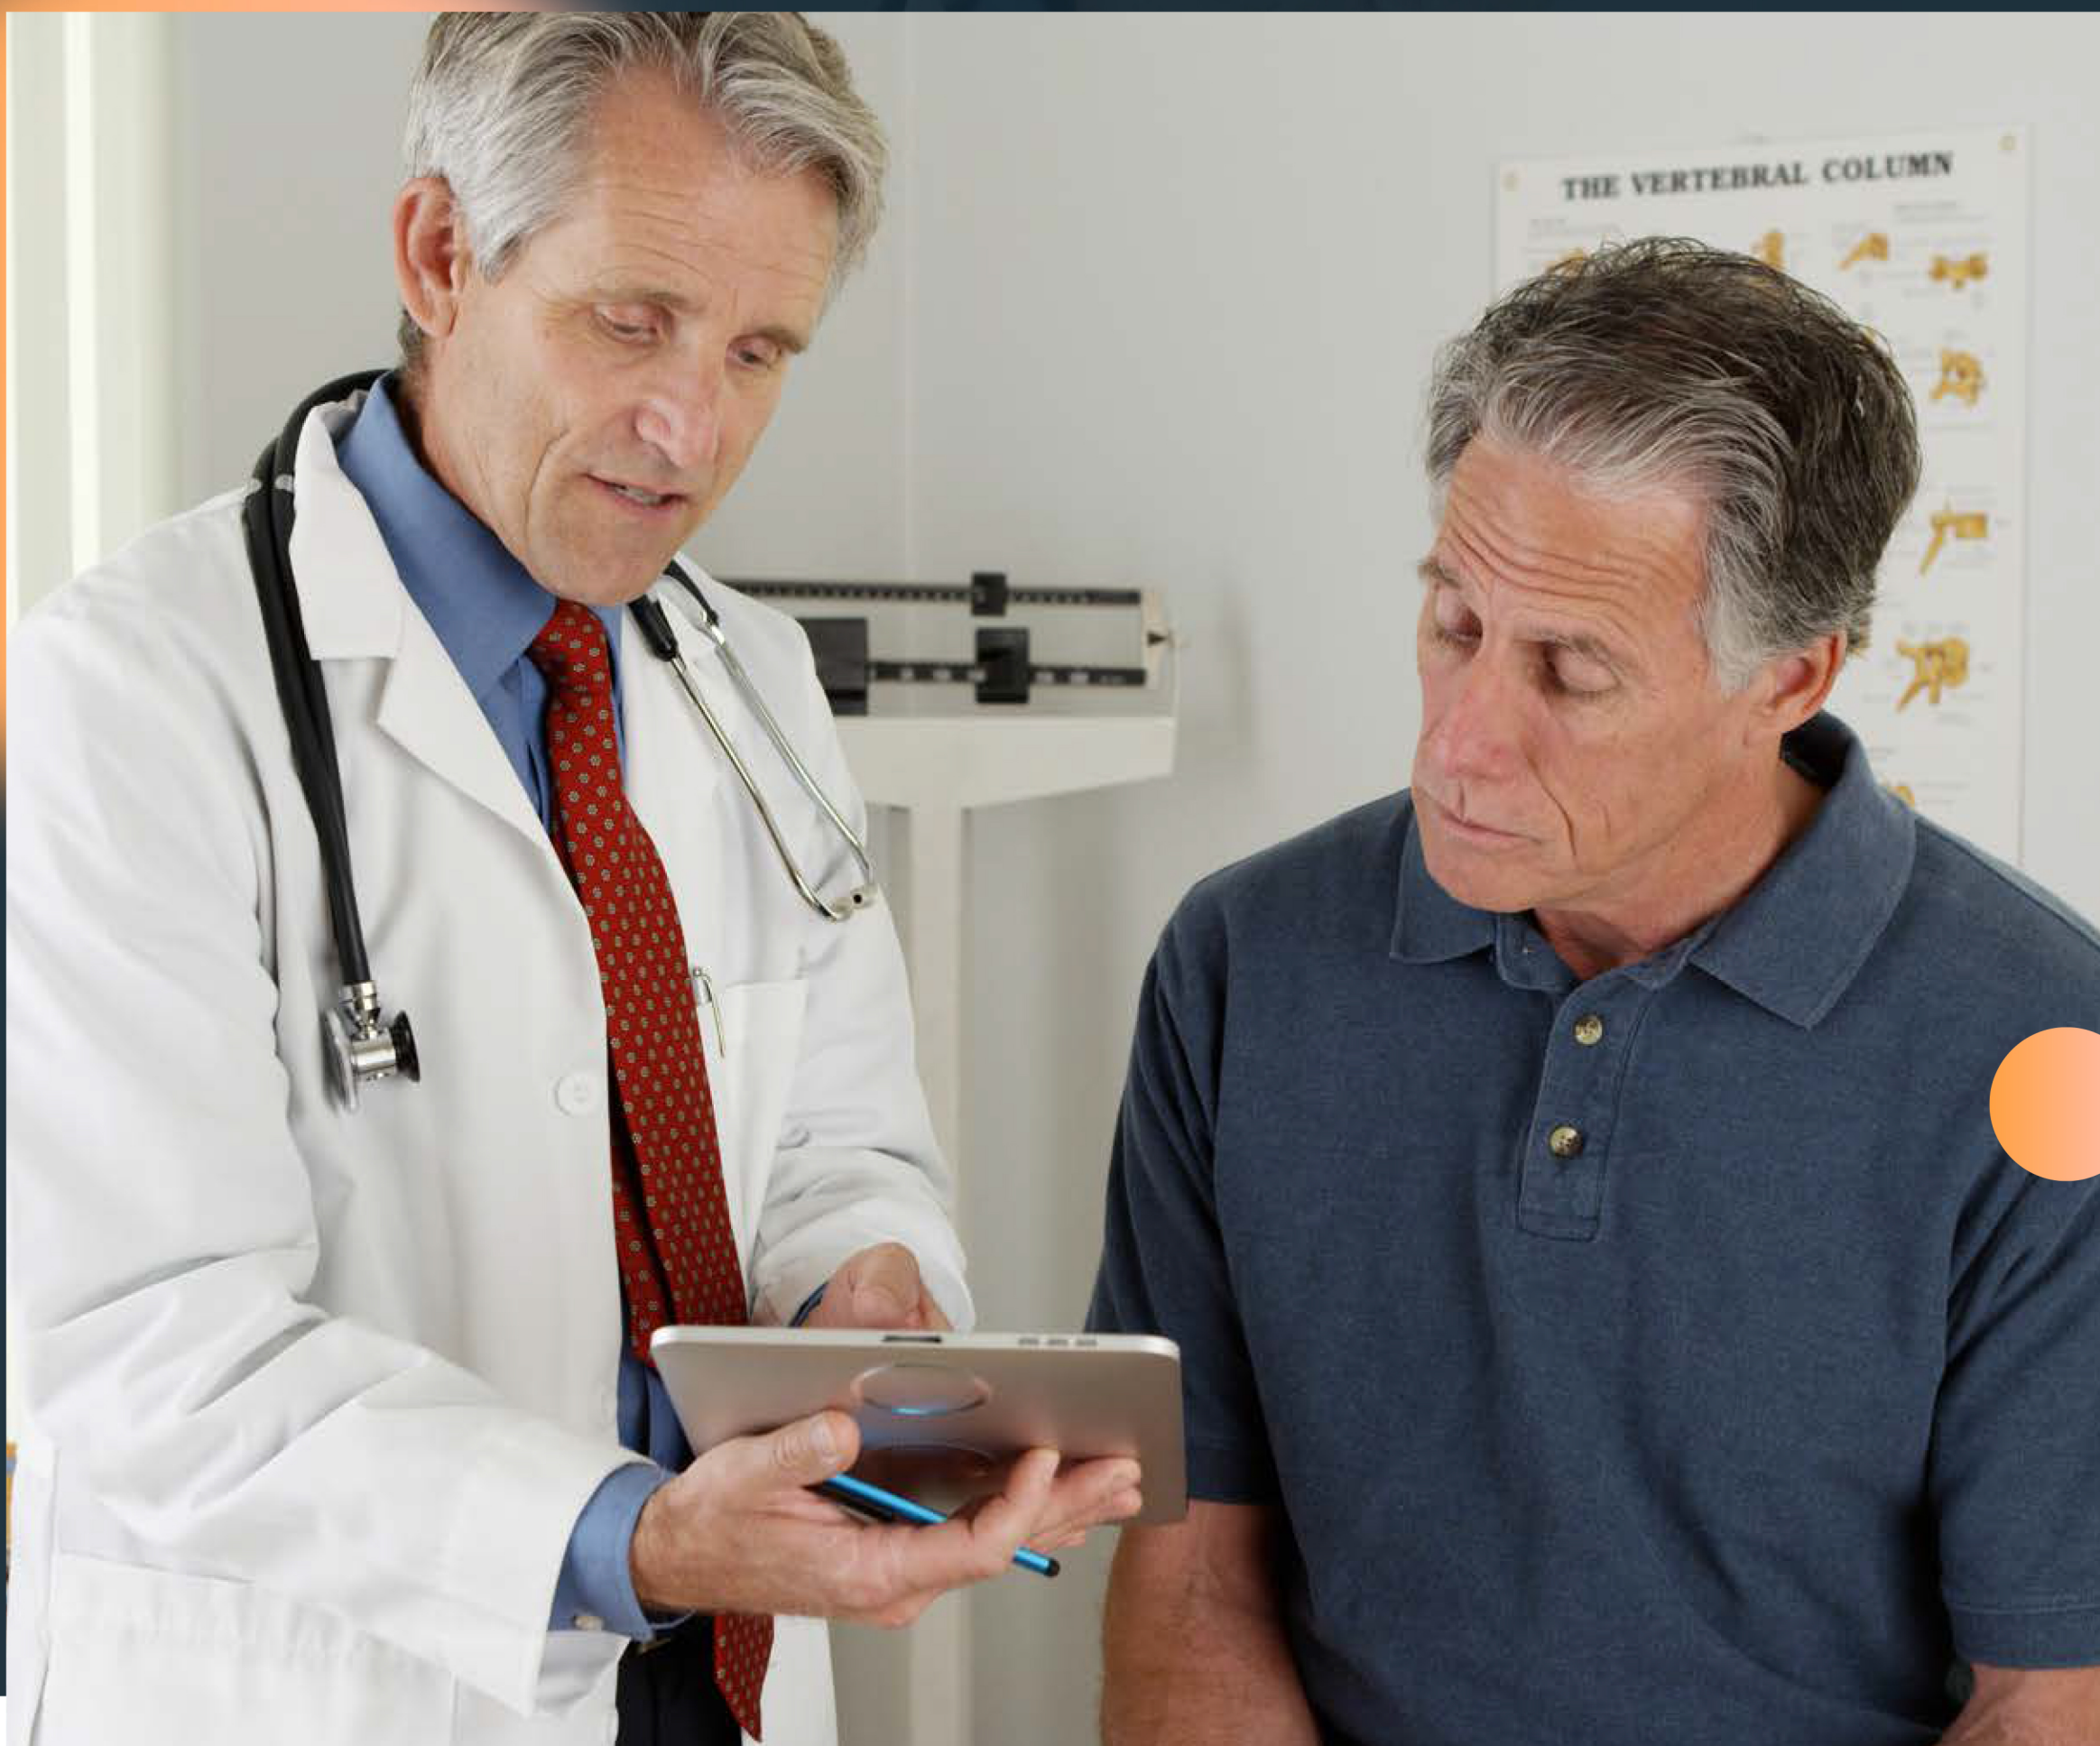

CIOX needed to modernize and rewrite their application.

The way forward

As technological partners, we are guiding CIOX in the modernization process of one of their main applications that are used by 3 out of 5 US hospitals and more than 16,000 physicians.
