

## Improving Health Data integration

Helix is the leading population genomics and viral surveillance company. It has been named one of the Top 100 Healthcare Technology Companies of 2022.

#HEALTHCARE #DIGITAL TRANSFORMATION

### Advancing Genomic Medicine

Helix needed to create their Partner Portal product to:

- Help customer admins manage their COVID diagnostics and genomics information in a faster way.
- Develop and introduce new technology.
- Enhance the efficiency and effectiveness of genomics information management.

### Goal

Helix needed to modernize to have better management and a faster collaboration for samples.

### Choosing the Tech Stack

As technological partners, we are guiding Helix in the modernization process of one of their user-centered HIPAA-Compliant solution for web that helps customer admins to have better management and a faster collaboration for samples.

TECH **GOLANG**    TECH **REACT**  
SERVICES **FRONT-END**    SERVICES **BACK-END** SERVICES **UX/UI**    SERVICES **QA**    SERVICES **PM**

### The Outcome

- User-centered HIPAA-Compliant solution for web.
- New ways of searching and viewing individual/aggregate samples and results.
- Optimize data protection.
- Better user activity reporting.
- UX flow improvements.
