

Improving online police reporting systems

LexisNexis Risk Solutions is a leader in providing essential information to help customers across industry and government assess, predict and manage risk.

#LAW ENFORCEMENT #PUBLICSAFETY

Uncovering opportunities

- They needed to develop a new app to:
- Offer a standard and customizable solution to be used for different Police departments.
 - Allow officers in the street and out of their patrols easily generate crash reports and citations.

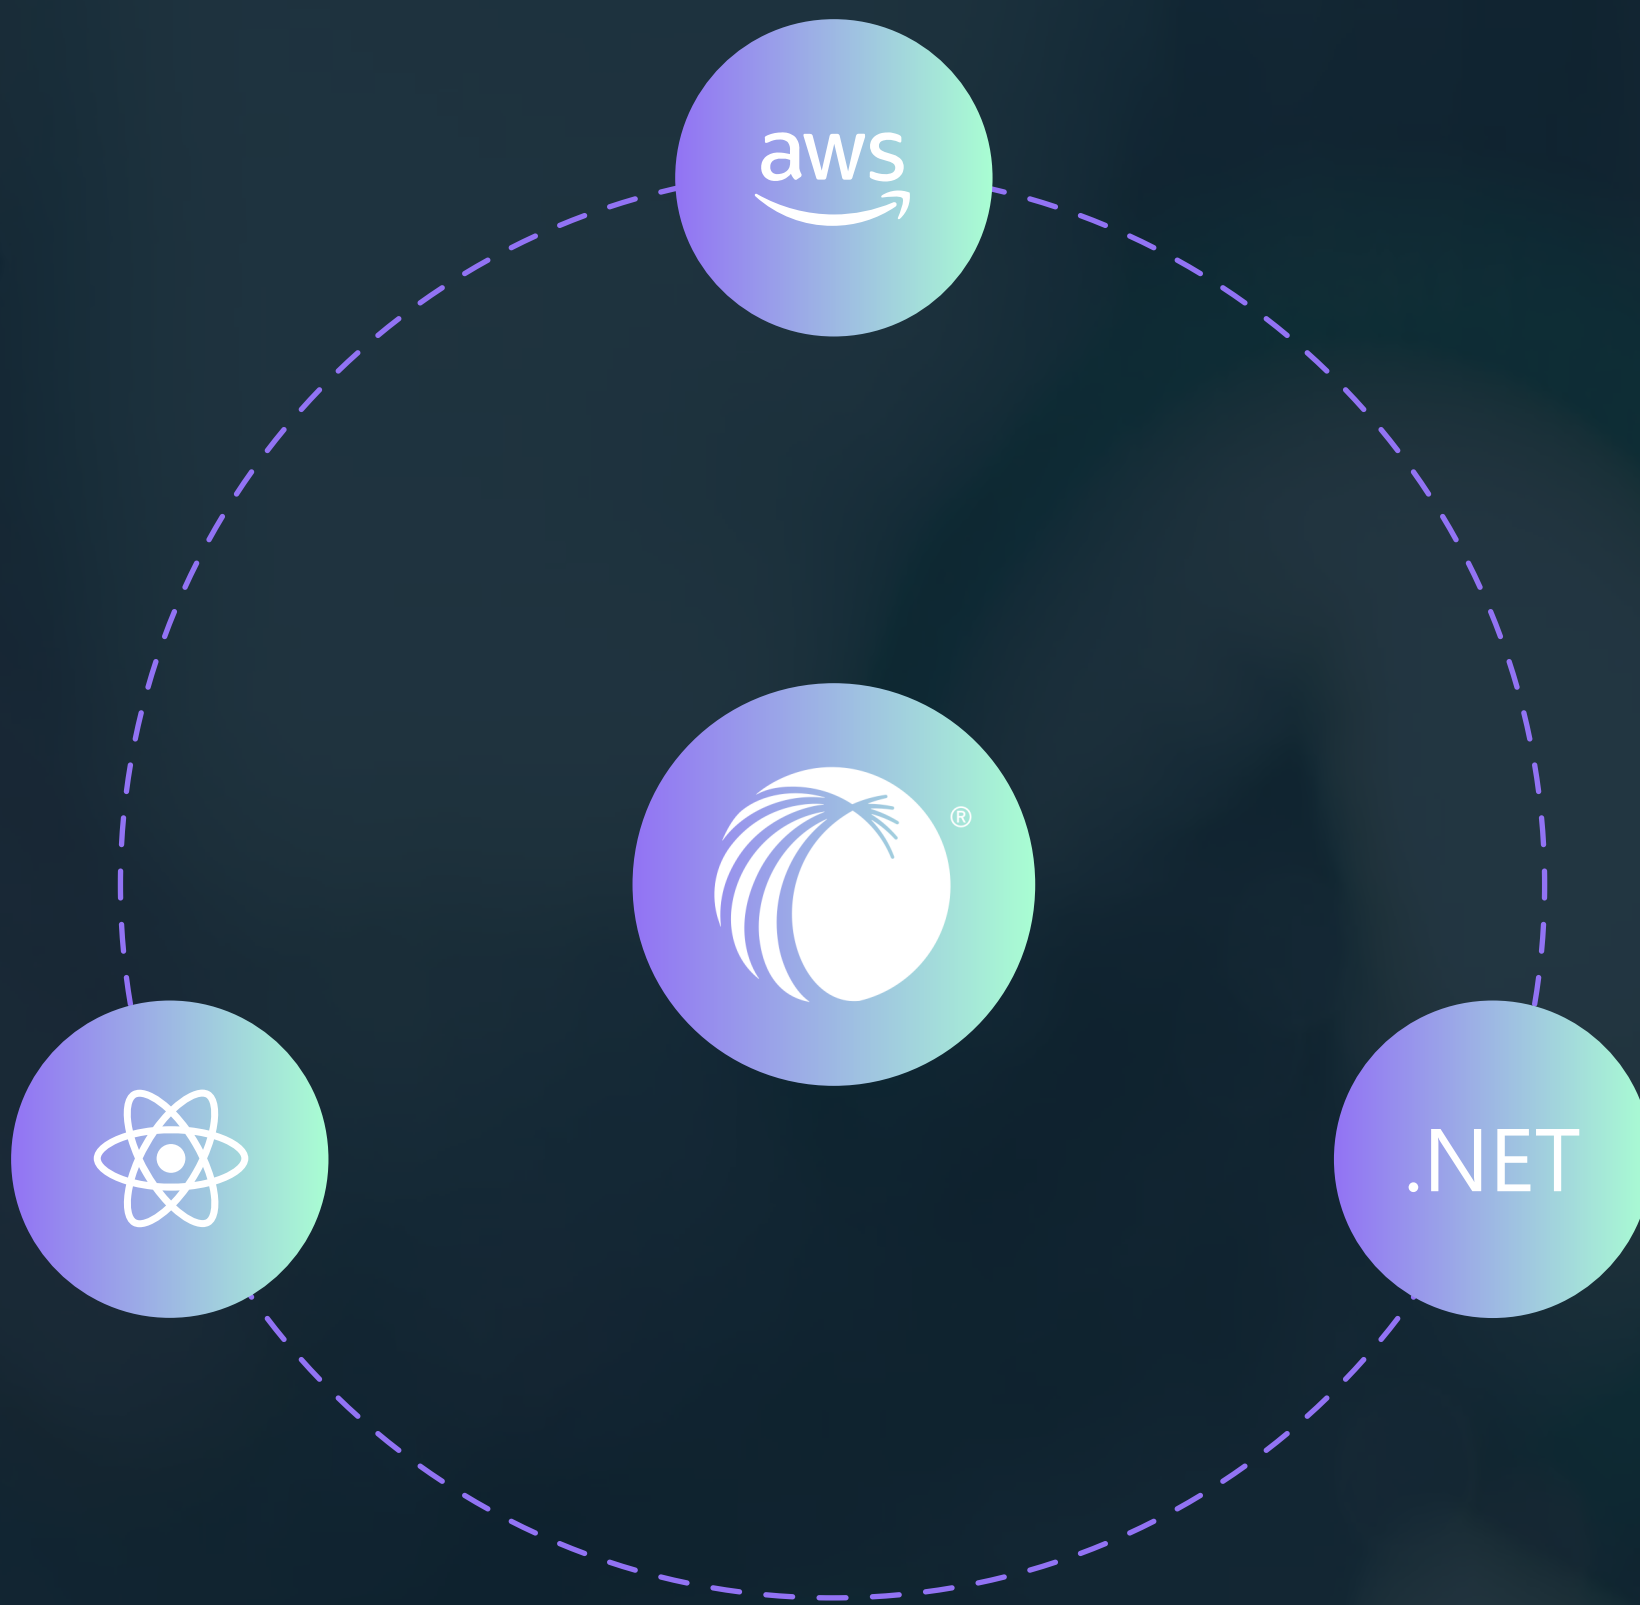

Boosting power of data

The goal was to improve online police reporting systems for automated crash and incident reporting.

Choosing the Tech Stack

We created a dynamic framework to develop a mobile application for iOS and Android devices. We focused on improving the User Experience, simplifying workflows using native features, creating as many as possible auto-populate fields, offering offline mode features, ability to print and generate pdf, support file attachments on S3, among others.

The outcome

- 100% accessible reports and data at-a-glance.
- 50-60% Improved streamline crash and citation reporting.
- 4,000+ US agencies using the app.
